to say that if the man who saw the Rogers murder, and said, "Jim don't do it," would come forward and tell who committed the deed he should have full immunity from publishment. The public reception of Warren and Cast lib by the Fenians takes place Frid is evening at Cooper Institute.

The Tribune says. The reports of cultaments for Cuba in this city are unfounded. A large number have volunteered to culist, but were declined. The Cubans have solidars enough on the Island and only want materials, with which they are being supplied as fast is possible by their agents here and elsewhere. Many American officers have been engaged to superintend the shipment of war material, and some in the South will go to Cuba and take an active duty.

New Advertisements 's o-Day

Now that the Pacific Railroad is an area. plianed fact, av rything relating to the enterprise, both in its inception and its progress be comes interesting. Col. Benton, we believe, was the first statesman who believed the project feas ible, deserving of Government aid, and looked confidence to its realization by the generation that should come after him. The Rochester Democrat also soys:

among the wise once, as wanta the measure the wind mill knight, Don Quizote. In fact, the idea of running the locomotive a tilt against the frowning battlements of the Sierras and the Rockys, was regarded, even by competent engineers, as only worthy to originate in the wild brain of the tiero of Cervantes.

The Hartley Carver here spoken of is to out knowledge living, if men of bis dry, to whom he was fond of acter of course. He used to spend his win New Orleans, and in the summer would his to vellons accounts in certain letters in our posses from one of them, written over twenty years ago coming through a private channel strongly confirms the position of the Rochester Democrat of the early identification of Dr. Car ver with this great railroad project, and his enthusiastic confidence in its uitimate realization.

Hon. Wm. C Bloss:

My OLD FRIEND. -I have a debt of gratitude to acknowledge to you, sir, and which I intended to have done be fore this date, but having been everywhere else but at Ruchester for a year past, and having every day of that time been particularly engaged. and under the bigbest degree of excitement, ! really have not come to it before. But air, you know I never fall to repay all favors and kind ness done to me, and vary seldom fall to punish always known me, and of my fellow countrymen of Monroe county, who has ever either by word or act manifested any disposition to assist me in my Oregon Railroad enterprise. You, sir, on two occasions, and in a public manner before the New York Legislature, spoke of me in becoming terms, and commendation, too, of me, se the original proprietor, and first projector of that sublime project of building a railroad con necting the Atlantic and Pacific Oceans together for commercial perposes. And, sir, you may consider your friendly aid to me in that gigaptic enterprise, as a capital of no small amount well invested, and if we both live, and I continu to prosper se I have been doing for the last two tores. There are but very few who know o imagine what I am doing, or what I am bound to accomplish it I live. And, sir, I have not time or inclination now to do saything more than to playing the greatest game ever played by the boldest and most desperate political grambler in

Lock Boxss.-All persons who want Lock Bozen are requested to leave their orders at the Post Office as soon as presible-

THE name of J. F. Biggine, of Oil Creek town-

The New York Board of Realth passed an o dinance forbidding the sale of illustrating elle that what has fif at but at a temperature and to the 20th of April Mr. Grant sent to below 1100 Fab. or that would avoive us explosire raper below that Suspenders. A few days since samples of oil were purchased in seventeen stores and subject to applysis, and every one was tound to be below the standard. The

report says : The first seven are not kerosen dil at all; they are bendine or mapthe, the most dangerous por-tion of the untural petroleum—the portion which is separated and rejected entirely as burning oil by all honest refiners. The addition of as little as two or three per cent, of benzine or sapths it sufficient to render good oil dangerous. Tule bensine is usually sold under some special name. It is the most dangerous substance that can be employed in the dwelling, and has been the cause of all the frightful kerdsene accidents, either then used by itacif or as an impurity in kero-

Various processes for rendering bennine, gas olice and naptha non-explosive have been pa-tented, and rights of sale have been disposed of throughout the country. According to Profes-sor Chandler, it is impossible by any means whatever to render these substances safe. The addition of a few grains of sium, potast, borax, alcohol, gum camphor, &c, to a barrel of ben since does not change its dangerous character in the least. The experiment of pouring a little of the fluid luto a bottle and applying a burning match, is no proof whatever, for to produce an explosion it is necessary to secure a certain ratio of air to benzing vapor, which it would not be possible to do in a bottle once in fitty times. Every oil that can be lighted with a match is unsufe for use.

The various "patent safety lamps" which are warranted for the use of any oll, (even beuzing,) are pronounced by the chemist to be wholly uneliable Benzine and dingerous kerosene, he insists, are always unsafe, no matter what lamp nay be used. One lamp may be a lattle safer than another, when in perfect order, but lamps will break, the oil will be spilled sometimes, Accidents will happen, and the oil or its vapor will be brought in contact with the flame, when, if the oil is not safe, an acaldent is sure to resul One half of the number of so cailed "safety lamps" are no safer than others, while the remainder are safe only so long as they are in per fect order, and are subject to no carelessness in filling or handing. What is needed to preven kerosene accidents is safe oil; with it all lemps will be sale.

The sumples numbered from eight to littees suclusive, are average specimens of keroscue which are sold at retail. They all contain more or less benzine, and consequently full to come up to the requirements of the law. They are rery dangerous.

The Canadian Monetary Times (Toronto) says The Hamilton Carbon Oil Company are reflaing about 1,000 barrels per week, by the new pro-cess, and about that quantity is being shipped each week to Boston and New York, where ! brings the price of the best American. The com pany are, at present, refluing in London, bu they expect their works at Humilton to be in operation in a few days. We tien of a sale of about 21,000 barrels crude, in tank at Petrolis at the rate of \$1.95 per barrel. This was a pice little cash transaction of \$32,000 Messrs. Par The Commissioner of Inland Revenue of Hall-

iax, Nova Scoria, has issued a departmental notice, based on an order to Conneil dated 25d April, allowing petroleum in process of manu lacture to be removed under removal bands. To reduce the fire test from 1150 to 1000 Faut for petroleum intended solely for exportation. To dispense in part, or in whole, with the payment of the fee for testing petraleum. To dispense with the branding or marking the same, if deem-

following regulations respecting the removal and exportation of petroleum Ist-Petroleum may be removed, in bond, from the place where it has been distilled to any other licensed refiner; for the purpose of deoderizing it, or otherwise completing its manufacture in bond, without payment of duty. 21-When petroleum in promanufacture is removed in bulk ontaining large quantities—and when the re moval is made under removal bonds, the inspecion fee of twenty cents per package is only t be collected on each tank or other package. 3rd specied and branded; or it may be exported or branding, the inspection fee is not to be col lected, but the refiner shall nevertheless make full return of his operations, and give a true ac count of the quantities refined by him in the same manner as if the products of his refinery were going into containation. An allowance for o occasioned by the process of deodoriza tien, not exceeding 7 per cent, may be deducted from the quantity specified in the removal bonds provided that such waste is proven to the satis-

A ROUGE ARRESTED AND COMMITTED -Yes terday morning about one o'clock, a rough named Mike Rouche, who was on a drunk, got nto a row in the United States Hotel, and became very noisy. Officer Doberty interfered and strempted to arrest him, whereupon Mike pitched into the officer in a lively manner, biting his hand and otherwise injuring him. After severe struggle Mike was hauled into the lock-up by Doberty, sasisted by several citisens. The priconer was yesterday wrongs done me. You, friend Bloss, have been brought before Justice Bates, and in default of veyed to Meadville this morning. Mike is a bard case, and if he finds it necessary to stay in Mead ville or Allegheny for the next six months or a year, we assure him this city will lose nothing

by his absence.

A Law suit in Now York is bringing out some juteresting facts concerning frauds in the ten trade. One of the witnesses easys that the marks on the packages are merely functiful to attract the eye, and do not accurately describe the quality of the tea. Some tess are designated "Eng lish Bronkfast Toa," while such a ten as that, as a lea, does not ex st. It is either "Souchong" or some les of that class, and they give it the at tractive designation of "English Breakfast Tea" to distinguish it from "Oolong" In fact it is coming to be understood that tea drinkers are among the greatest victims there are to the kind of rescality in Chica which in this country is ac

the generation that should come after him. The flochester Democral also seys:

About thirty-two years ago, Dr. Hartley Carter excited suspicions of his manuity, by proposition, through the columns of a New York journal, the project of constructing a Pacific railroad its had to advocate the sections in the newspapers for ten years before he could sufficiently raise it above the region of absurdates to induce others to join him in memorializing Congress on the subject. But Congress turned the cold-houlder upon so adminerical a project, and the courageous Doctor, aided by Ans Whitteey and others, again had recourse to the press, for the purpose of manufacturing public opinion in favor of the measure. It required the most prisitent bombardment of talk, speecher, reactuations, public meedings and newspaper articles until the year 1858, to beduce Congress to go so for as to order a gevernment arrey for the purpose of determining the possibility of the construction of the Pacific Rairond. For a long time siter that, so visionary was the project, in the eyes of the old fogies, that when Fremout ran for the Presidency upon a platform, one plank of which advocated the building of the load, the title of "Pathander" is inferred upon him by his friends, awakened as much deriation

is, he must have fallen into withe sere and yellow leaf." We recoil tet blue se a dressy, fussy old fellow twenty years ago, who had the Pacific (or Oregon, as he used to call it) railroad on the brain, and who talked about it in season and out of season, as the Demo erat saja. He was as great an "American Tra valer" as Pract is now, and as egotistical a pub-lisher of his wonderful expioits as George Francis Train. He appeared to have foll 0 money, and was the reputed familiar of the great ring as being united with him in this or that par ticular scheme, which was always of a very gigan ters at Washington and at State Capitals, or at the then wilds of the Minnesota territory. Of the nature of his pursuits and his political intrigues, we have the evidence, or rather his mar sion; but we will only reproduce a passage

the only man of my old acquaintanees who has \$1,000 ball committed to jail. He will be con hint to you the facts. Suffice it to say, sir, I am
